Services

Case Study

Gordian Health Management is a leading provider of outcomes-focused healthcare consulting. Gordian offers solutions for financial performance improvement, business process reengineering, executive management training, improved clinical outcomes, and achievement of excellence with integrated care and financing strategies.

Customers Include:

- Integrated Health Systems
- Health Plans
- Small and large hospitals
- Physician groups
- Ancillary care companies
- Employer groups

Gordian consultants are all senior managers and clinicians, MDs, RNs, PhDs, who have extensive management and administrative experience.

Pricing for consulting services may be determined according to accomplishment of an overall management plan or by individual outcome. Please contact us for further details.

The Challenge:

Clearview is a large metropolitan facility serving a multicultural population in North Texas. Because of large turnover of management personnel and poor overall financial performance, Gordian was called to design and implement a program to help increase revenues and improved clinical performance.

The Solution:

Gordian's expert consultants completed an assessment, created a comprehensive plan for integrated service improvement and put a team in place to help bring the facility to the desired level of clinical and financial performance.

The Benefits:

Results of the program include:

- Reduced cost
- Increased referrals and utilization for inpatient and outpatient procedures
- Improved multi-department clinical competence
- Business processes that captured missed charges and reduced health plan denials
- Improved physician and patient satisfaction with hospital service delivery
- Increased overall revenues for all services.
